                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Length 15;
                                                                                                                                                                                                                                                                                                                                  US-09-475-947A-158/C

US-09-475-947A-158/C

Sequence 158 Application US/09475947A

Patent No. 6472154

GENERAL INFORMATION:
APPLICANT: Wren, Johnathan D.
APPLICANT: Wind, John D.

TITLE OF INVENTION: Polymorphic Repeats in Human Genes
TITLE OF INVENTION: Polymorphic Repeats in Human Genes
CURRENT APPLICANT:
CURRENT APPLICATION NUMBER: US/09/475,947A

CURRENT FILING DATE: 1999-12-31

NUMBER OF SEQ ID NOS: 346

SOFTWARE: PatentIn Ver. 2.1

SEQ ID NO 158

MANNER OF SEQ ID NOS: 2.1

SEQ ID NO 158

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        US-08-545-860D-86

Sequence 86, Application US/08545860D

Patent No. 6040140

GENERAL INFORMATION:

APPLICANT: Cancent, Earlo

TITLE OF INVENTION: Diagnostics, Therapeutics and Methods

TITLE OF INVENTION: Pagnostics, Therapeutics and Methods

TITLE OF INVENTION: Pagnostics, Therapeutics and Methods

TITLE OF INVENTION: Pagnostics, Therapeutics and Methods

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

TITLE OF INVENTION: For Detection and Treatment of Acute Leukemias

Sequence 6031, Application US/09198452A

Sequence 6031, Application US/09198452A

Patent No. 6559294

GENERAL INFORMATION:

APPLICANT: Griffals, R.

APPLICANT: Griffals, R.

TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragr

TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, I

TITLE OF INVENTION: and treatment of infection

TITLE OF INVENTION: 1910-03-999

FILE REFERENCE: 9710-003-999

FURRENT APPLICATION NUMBER: US/09/198,452A

CURRENT FILING DATE: 1998-11-24

NUMBER OF SEQ ID NOS: 6849

ERNGTH: 20

Sequence 3602, Application US/09371772B

Patent No. 6566127

GRNERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Revico, Pam

APPLICANT: Becobed, Jaine

APPLICANT: Becobed, Jaine

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION WHERE: US/09/371,772B

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14425

US-09-371-772B-1078/c

Sequence 1078, Application US/09371772B

Factor No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Bacobach, Jam

APPLICANT: Stinchcomb, Dan

APPLICANT: Matheo, Wethod and Reagent for the Treatment of Diseases or Conditions Refile REFERENCE: Matheo, 876-0 (237/198)

TITLE OF INVENTION: Levels of Wescular Endothelial Growth Factor Receptor

CURRENT APPLICATION NUMBER: US/09/371,772B

PRIOR PAPLICATION NUMBER: US 60/005,974

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1995-10-26

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PatentIn version 3.0

SEQ ID NO 1078

LEMEGTH: 17

Patent No. 6238876

GENERAL INFORMATION:

APPLICANT: Altaba, Ariel Ruizi

TITLE OF INVENTION: METHODS AND MATERIALS FOR THE DIAGNOSIS AND TREATMENT

TITLE OF INVENTION: OF SORADIC BASAL CELL CARCINOMA

FILE REFERENCE: 1049-1-008N

CURRENT APPLICATION NUMBER: US/09/102,491

CURRENT FILING DATE: 1998-06-22

Sequence 7203, Application US/09422978

Patent No. 6537751

GENERAL INFORMATION:
APPLICANT: Cohen, Daniel

APPLICANT: Chumakov, Ilya

TILE OF INVENTION: Biallelic markers for use in constructing a high density...
FILE REPERENCE: GENSET.020001
CURRENT APPLICATION NUMBER: US/09/422,978

CURRENT FILING DATE: 1999-04-21

BARLIER FILING DATE: 1999-04-21

BARLIER FILING DATE: 1998-11-23

BARLIER APPLICATION NUMBER: US 60/109,732

BARLIER APPLICATION NUMBER: US 60/082,614

i Sequence 2, Application US/08893204C

i Sequence 2, Application US/08893204C

i Patent No. 6043044

i GENERAL INFORMATION:

APPLICANT: Hudson, Perry B.

APPLICANT: Hakki, A-Hanid

ITILE OF INVENTION: DIAGNOSTIC AND PROGNOSTIC MARKER

TITLE OF INVENTION: FOR METASTATIC ADEMOCARCINOMA

NUMBER OP SEQUENCES:

CORRESPONDENCE ADDRESS:

ADDRESSE: ROSenberg, Klein & Bilker

STREET: Blicott Center Drive, Suite 105

CITY: Blicott City

STATE: Maryland

COUNTRY: U.S.A.

ZIP: 21043
                                                                                                                                                                                                                                                                                                                                                                                                                               Length 15;
